

**Easy to service
world-wide distribution**

Air breather

KE 2461

nominal flow rate 300 m³/h

1. Features

- Modular design
- Low space requirements due compact construction
- Fitted with high efficient oil separator elements.
- Residual oil content < 1 mg/m³
- High dirt holding capacity, extended service life

2. Description

The air breather KE 2461 is designed for venting hydraulic tanks.

It prevents the ingress of dirt during the intake of air.

At exhalation, the oil aerosols will be retained from the special designed elements. The retained oil can be drained off into a leakage tank. In order to achieve the required cleanliness classes the oil can be returned to the reservoir by using an additional check valve and a line filter.

3. Specification

Design:	filter for tank top installation
Housing:	sheet metal varnished
Filter element:	oil separator
Retention rate:	SAE fine > 99.5 % oil < 1 mg/m ³

Standard version suitable for air with contents of mineral oil

Subject to technical alteration without prior notice!
